Semi Transparent Exterior Waterborne Wood Finishes

Exceptional Beauty, Performance & UV Protection The Norway Lodge Factory Finish

To protect your natural wood sidings from the harmful effects of moisture and the sun, you need a finish that works with the natural characteristics of the wood. The Norway Lodge Brand of Environmentally Compliant Waterborne Coatings are engineered to both compliment and protect the wood by blocking UV rays and preventing moisture from accessing the wood. When properly applied in

our factory setting, the Norway Lodge finish will offer years of maintenance free performance and provide a finish that stays “looking new”. The Norway Lodge Finish is VOC-Free for the ultimate in environmental compliance and is offered in a semi transparent finish to allow the beauty of the natural characteristics of the wood to shine through. Real protection on real wood. It doesn't get any better!

Coatings

I have used Norway Lodge on more than one thousand projects with outstanding results. Smooth log siding jobs coated with Norway Lodge still look new after six years of exposure to the elements. The finish is very flexible and that helps it hold up to expansion and contraction without cracking and peeling from the stress.

3 Coat System - The base coat seals the wood to protect it from harmful UV rays and damage from moisture. The base coat not only promotes dimensional stability, it also provides an excellent surface for top coat applications. We then apply two layers of the top coat to fortify the UV resistance and to obtain the final desired color.

Fast Drying - At 60-75% relative humidity, recoat time is 45 - 60 minutes as compared to the multiple hour delays you can expect when using competitive brands.

Pseudo- Elastic Properties - Our layers of protection expand and contract naturally with the wood to prevent any cracking, peeling and flaking of the finish.

No chalking or fading - Unlike other finishes, our product protects from UV damage preventing the onset of a degraded finish.

Environmentally Complimentary & Safe - The unique waterborne nature of the Norway Lodge System permits easy clean up with water while the finish is still wet. Our ZERO HAP CONTENT makes the Norway Lodge System the choice for safety and the environment and gives you the flexibility to distribute and store the product without hazardous material restrictions.

Proven Performance - Norway Lodge has undergone both extensive laboratory and field application testing. Independent Lab Testing recognizes the Norway Lodge Factory Finish System as having the BEST WEATHERING CHARACTERISTICS of any finish in its class!
